Casual leisure is the most important time of the day and it needs to be spent correctly. In free time, people should engage in self-development, hobbies, sports, entertainment and recreation because only in your free time a person can do really important things for himself.

As for me on weekdays after university, I go to the library to do my homework then I read an interesting book after I read a few chapters I start doing English. I read stories in English to discuss them with myself for practice. I watch movies in English and write short stories in English for practice. When I go home, I listen to music and start dreaming.

At home, I spend my free time with my family. In the evening we go to sit at the table and tell each other different stories or how the day was sometimes we play bingo or together watch TV. When no one is at home I draw I think it is amazing to draw because you transfer your ideas from your head on a piece of paper and it is very relaxing for me to be in harmony and create what my soul desires.

On weekends, my cousin comes to visit me, we go to the gym together there we swim, play ping-pong and dance in the gym, we spend a lot of time. After the gym sometimes, we go for a walk to the center or to the cinema.

Finally, I believe that in free time man should not be lazy he always should be working hard over and seeks to perfection. Set goals and achieve them. I try very hard to develop in all areas for me it means a lot. In my opinion, it is necessary to spend your free time, to engage in self-development, to find your vocation and of course spend a lot of time with parents.
