All people have a place where we feel safe. For me, it is my home, which has protected my peace since childhood. If I have a bad mood, I come here to listen to music. When I have fun, I invite my friends. I live in a flat in a kind of semi-detached house. In general, there are 4 rooms: a studio (a kitchen and a living room), a parents' bedroom, 1 children's room and a dressing room.

Very often members of my family do not have enough space. That is the reason why we sometimes have a small mess. The walls are decorated with family pictures. Moreover, on the window sills, we have flowers that I water twice a week. So I put my piece of the soul into the overall comfort.

Perhaps, luxurious sofas or beds are the main part of any room. The fact is that we often have guests in house. The most appropriate saying here would be: «The more, the merrier». I would like to pay special attention to the decoration of my house. There is my bed, my desk, where I spend most of my time, and a closet. The room has excellent decor. In this regard, I support the idea of minimalism. The room is bright and spacious. The sunlight, which creates a good mood, pours every day from a wide window. In my opinion, our character is formed depending on the place where we live. If everything is good at home, then you will certainly feel confident in your abilities .
