A fear is a feeling, which have people, when they're afraid of anything. I think, that this feeling is familiar to everyone. I think, that no people, who don't know, what is the fear. We can meet fear in everyday life or not usually. It depends on of us. If we have more fears, we will be meet with them more. The main thing is to deal with them correctly. There are people who don't fight with their fears. And, they continue to be afraid of anything during their all life. But, there are such people, who fights with them. They make an effort not to be afraid, but to be able to resist. I respect these people. And, I think, that it's true chose. Fear may be any things. People can afraid of dogs, snakes, birds or other animals. So, people can be afraid of any feelings, such as loneliness, love, darkness, be indoors, fear of not fulfilling a dream, or other feelings. All these fears can be overcome. In modern life, the people become more cowardly, because modern life is very protected. Almost all people live in houses with locked doors in their warm bed. There are very much safety systems for houses, apartments, offices and so on. And people who live in such places do not encounter dangers, as animals, that can enter the house, as bad weather, and thieves and people with bad intentions can not enter these places. But, if people met with dangers, they're afraid of them. But, in old times, when people live in the streets, in the woods, in the predatory environment, they met with various dangers, and they must fight with them, to be in life. So, they learn to fight with them, and don't afraid of them. Fears are destroy our lives, our plans, and we can't live, how we dream about it. Therefore, we must get rid of them and live our life, such, as we want to live, as we dream.

I totally agree with the statement: "Fear can prevent people from pursuing their dreams.". Despite fears, people must to make dreams come true, in my opinion.
