When I think about my future, I can't say exactly what it will be. Many people don't know who they want to be. But I am sure that the most important thing for me in the future is my profession and family. I believe that a good education is necessary to get a good job. The profession is a very important choice that will determine the rest of my life. I'm glad my parents are supporting me.

Now I combine both work and study. I want to find a better job in the future.

I study at the university. I want to become a psychologist and work in some campaign. I know that many psychologists today can not find a job. But as for me, I have a really great interest in my future profession, and I am a hardworking and responsible person, so I hope that I can succeed. We always need highly qualified specialists. Also, I want to have my own family in the future. You can't go far without a real loved one by your side. I plan to have children and live in my own house. As for our family, it's quite large, but our apartment is quite small and is on the eighth floor, so I can't have a pet. But I love dogs. So in my future life I will definitely have a dog, because a dog is like a real friend.

Of course, I hope that in the future I will have the opportunity to travel and meet interesting people. I want to drive a car. It sounds like a dream right now, but it's something I want to have and do. I am sure that the plans start with a dream. And I hope that my future holds many pleasant surprises for me!
