I do not really like to read short stories. I like to dive into the whole world created by the author. Live it while reading. But this work by Mark Twain I really liked. The work tells us about hard times and about true friends, whose ingenuity and positive thinking literally saved them from dying from hunger.

I liked the fact that the story tells about friendship. If there are true friends alongside who will support and help in a difficult situation, you will not be lost. And also that only hard work can lead to success.

At a certain critical moment they invested all their strengths, did not lose heart. In general, I find this story amusing and instructive. Even inspiring! We should have paid more attention to such things. Although their deed with the incitement of death is not a positive example. This is perhaps the only negative point in the story. And the goals they pursued. But what can not you do to survive.
