I live in a country called Kazakhstan and we have three languages in which most of the population or people speak the name of these languages is our Kazakh language Russian language and the third English language is needed for the international level but for some it is difficult to know three languages because it requires a lot of effort a lot of knowledge and you have to know a lot of words from each language even sometimes it is difficult for polyglots to know the words of a sentence, etc. in more than 5 languages and I am glad that you need to know three languages in our country, since for an ordinary person who lives in a city or in the city center it will not make it difficult to learn to know these languages, since these languages can be easily learned for young people in our country since the first language is the Kazakh language, which Kazakhs know this language from time immemorial and although it is difficult for a foreigner to learn it, if you work hard, everything is possible and the second language is Russian and this language is very rich and rich in its history and it is a very amazing language, since this language has a lot of old words and funny words now that they are not or simply not used and it is a little harder to think than Kazakh because here you should know the grammar endings and where the stress falls, but if you learn it day and night then I think it will turn out at least something is better than not knowing anything about this language at all and the third language is English, basically even very often we use this language in order to communicate with foreigners, since it is probably the second language in the world and to communicate with foreign investors or, in general, just to communicate with residents of another country and in this language, as in all languages, you should know the words grammar how they can be built, but here the structure of the sentence is slightly different from the Russian language, but in general it can be studied in a couple of months than other languages, but this language also has its own culture and history about which many do not know except for specialists, here we have three official languages in my country
