I usually Wake up early around 8 am. I make my bed, wash my face, and go for a run. After that, I have Breakfast and go to the computer to study a little. If I have time, I sometimes play computer games,but I often program or write scripts for games.

After finishing all my chores, I'm going to the Institute.The journey to the Institute takes about 1.5 hours, so I leave 2 hours in advance, so as not to be late.At the Institute, I meet my classmates, we talk and go to classes.The lessons often serve interesting material that is really easy and interesting to listen to.

After classes at the Institute, I usually work out in sports sections or at the stadium. I love sports and try to complete all the tasks in the program. After sports, I go home and rest. After a little rest, I start my homework.Sometimes it takes about 2 hours.When the lessons are done, I try to help my parents with household chores. I can do the dishes or sweep the floor. I also take care of the dog, make sure that it has clean water and food.

In my free time, I usually go out with friends. We can go to the movies or any place where you can have a good rest.We also like to go to the movies or play computer games. But usually this can only be done on weekends, because on weekdays the whole day is busy. Sometimes we play various Board games as a family. Or I can read interesting books or play computer games in the evenings.I like to read detective stories, science fiction, and novels.I play mostly logic games or shooters.

Basically, my day is the same, because now it's scary to go out because of the pandemic.

(В тетради у меня вышло на 3 страницы)
