Let me introduce myself. My name is Artem. I am 16 years old and I am currently studying at the Synergy College. I will become a professional programmer soon. I have a family of four. It consists of both my parents, me and my sister. I was born in Stavropol and my parents still live there while I moved to Moscow. I adore visiting them during my holidays as it is a real chance for me to relax and enjoy some time with my family. We have lots of animals at home: a dog, a cat, some fish and a parrot. My little sister takes care of them. When we meet we usually share some stories and enjoy the time. I'm good with computers. That is why I decided to become an programmer. I like to communicate with people and make new acquaintances. I am quite sociable, so in the future I plan to find a job that will allow me to communicate with people directly, I like it. So that is the smallest part that I can say about myself.
