My favorite countries for vacation include Thailand, Spain, Greece, but Dubai is my favorite country. A trip to Dubai is a trip to a country of dream come true. Magnificent airports, tall buildings with lavish interior decoration, expensive cars on the roads, a diamond supermarket, a seven-star hotel, a ski resort and a zoo right in the middle of the desert, a sparkle of gold ... In Dubai, there is the Burj Khalifa skyscraper, the tallest building with a crazy view. Another attraction is the aquarium, which is located in the Dubai Mall shopping center and impresses with its size. Sharks swim at arm's length from visitors! 33 thousand representatives of the underwater fauna live here. In the Dubai indoor zoo, standing on the sands of the desert, even penguins live. By the way, the rooms are well-conditioned, and the animals are carefully looked after. The most fantastic thing you can do in a country where the desert occupies almost the entire territory is skiing. Ski Dubai, a man-made indoor ski resort, takes you in a couple of minutes from the scorching sun to the light frost of the Alps. Those who like to swim more are advised to go to Aquaventure or Wild Wadi water parks. In the desert you can do sandboarding - ride a dune on a board or go on a jeep safari. You can still jump with a parachute, see a camel race, hunt for crabs under cover of night, swim with sharks, play golf, fly in a balloon or helicopter Dubai has a shopping center where you can find absolutely everything: from pins to exclusive Ferrari models. In addition to boutiques with clothes, shoes, cosmetics and perfumes, appliances, sweets, jewelry, there is also a huge aquarium, an Olympic skating rink, an indoor traditional market, an entertainment center for children, a dinosaur skeleton and a full-size airplane model, a three-story waterfall and a completely breathtaking view of the tallest skyscraper in the world. Special attention, in my opinion, is monitored by the Dubai musical fountain. The world's largest color music fountain, located on an artificial lake near the Burj Khalifa skyscraper. The design consists of several arcs, the height of the largest of them is 275 meters. During the presentation, more than 6,000 thousand light sources are turned on. Thanks to the play of rays, bizarre figures are formed on the surface of the lake, reaching an incredible height of 150 meters.
