In this essay I want to talk about the reasons why I chose my profession. There is a lot of things that attract me in this industry. But now I would like to talk about the most significant reasons, which became decisive for me in choosing the direction for education.

First of all, when I was choosing a profession, I was sure that I want to engage in art. And certainly design- is very creative job. This profession is based on artistic skills and creative thinking, and this is very close to me.

Secondly, this profession will open great opportunities for self-development and traveling. Because this industry always requires actual knowledge and fresh views.

No less important fact is that is very profitable profession with great opportunities for career growth. A good salary gives me a great resource for realizing myself in life and strong motivation to move on.

Finally, this profession is relevant all over the world and at any time. This will very helpful for me in the future, when I will look for a job.

Taking everything into consideration I can say that choosing a profession of a designer is the best way for me combine business with pleasure.
