The first step to achieve this goal I have done - I have entered to University to study linguistics. Although this alone will not be enough, because my success in learning any skill depends on it. For learning English I need to practice, so I try to study English every day. I study English grammar, do exercises, read books in English. Also I watch movies in English, watch different videos, chat shows on YouTube. But my favorite way of learning English are special educational programs, for example, LinguaLeo, which allows me to improve all of my skills, including speaking and listening. Also to improve my skills I want to speak English, want to meet foreigners for whom English is the native language and to go to an English speaking country. I am sure that if I will not back down from my goal I will be able to speak English fluently.

Also I love mixed martial arts, it is my passion and I dream of becoming a professional fighter. This is my main goal. I have practiced karate since the age of five, and at the same time I do Thai Boxing, I constantly participate in competitions and many times became the winner. In order to become a professional fighter, first and foremost, you need to lead a healthy lifestyle, so I do not smoke and do not drink alcohol and eat only healthy and useful food. To achieve this goal it is very important constant training in order to maintain myself in good physical shape. So I consistently run every morning, walk four to five times a week to practice and train in the hall for four hours.

I'm sure if I'm going to try and work hard on yourself, I will surely achieve all my goals.
