Traveling is always something new and interesting, it is a meeting with new people, cities and attractions. We also travel to work. Most often, people go on vacation travel. Some people prefer warm resorts, southern countries for relaxation, they enjoy the view of the sea, sand, shells and waves, this group of people enjoys swimming in the sea, the warm sun and fresh breeze, and sea excursions. Other travelers like to visit countries and cities to get acquainted with the new culture, to see how other people live, to admire world-famous cultural monuments. Still others prefer extreme trips; they are interested in seeing mountains live, climbing them or independently mastering the seabed, rafting down the river.

Traveling by plane, train, bus and ship. The first two methods are the most expensive, but fast and safe, the other two are cheaper and better suited for traveling from city to city. You can also travel by car with family and friends, seeing beautiful landscapes outside the window.

I love traveling, but not as often as some. Sometimes I want to be at home or spend time with friends.
