I will begin with the fact that everyone dreams of traveling! And rarely see a person who refuses this! Someone wants to go to the sea, and someone goes to see the sights of other nations. And everyone chooses exactly how to travel, someone on a bicycle, and someone on a car, plane, as well as on foot. Of course, traveling by plane is faster, but it is more expensive than other options. Anyone can travel, regardless of age. And the most traveling nations are Hong Kong, they spend about three thousand dollars on each trip, and Luxembourg takes the second place, they spend an average of six thousand dollars. Now about where more people go to travel? A large number of people go on vacation to the United Arab Emirates, and more specifically to Dubai. This place was a bare desert many years ago, and at the moment it is the richest country, and there is also the highest building of the Burj Khalifa, and huge forms of entertainment, beautiful places, luxury cars, in general it is worth it. Now let's move to Maldives, this is a tropical state in the Indian Ocean, people go there in huge numbers, because everyone wants to relax in the middle of the ocean. And also many go to Turkey, this is also a good place where it is profitable to relax and eat tasty food, tourists are attracted by the famous Hagia Sophia with its domed dome and Christian mosaics, the majestic Blue Mosque of the 17th century and the Topkapi Palace built in the 1460s - the former residence of the Ottoman sultans. Thanks to the journey, a person develops imagination, and he also learns more about the world in which he lives!
