It is difficult to answer, I can do a lot (or not) a bit. For example, I danced for 11 years, now I have the first rank, I studied kendo for a year and a half, went to a seminar with real Japanese masters.

In the summer, I finally bought videos, all my life I dreamed of learning to ride, but my whole life was forbidden to do this. But they are bought and we went with one of my best friends to ride. Surprisingly it turned out to be easier than I thought, although I am still afraid of a fast ride and there are still difficulties with the turns.

I never knew how to play the piano, but when you celebrated a friend's birthday, I decided to try it. In 15-30 minutes it almost came to me to play a melody, I think the chances of learning are already great!

Although I still couldn't learn how to play the flute, unfortunately it was not my fault. Although ... I'm interfering with my father, or neighbors who have not even greeted for 6 years, constantly screaming at night and listening to music loudly, begin to burst at the door screaming as soon as I start learning to play.

Also, I really like to play table tennis. And I can say I'm playing pretty not bad! (Thanks to my school friend who taught me, although his methods were very tough ...) At school, we gathered at the tennis table every break and played 1 vs 1, 2 vs 2 or in "Sunny". And in the summer in the first year, we were also often going to play, but then stopped for no particular reason. It is rather strange, but what to do.

Now there is simply not enough time for hobbies, either study, or household chores. I hope that I can handle this all and begin to devote more time to my hobbies.
