In our time there is not people who doesn't know what a computer is. You can ask children: "Do you know a computer?". And they easy answer to this question. It is difficult for us to imagine life without a computer. But a few dozen years ago the computer was not still. The computer appeared a few dozen years ago. And it was not a lot of people. But in our time the computer is practically every person in the world. It is fantastic. And technologies are not standing still. They are improving every day.

Why do we need a computer? What are benefits of the computer for us? Where can we use it? Now we need the computer for different things in our daily life. Everyone needs it. We do a lot of things with the computer. We work in the office. And the work just stops without the computer. We cannot do anything. We need to print a document, to write a report, to send a letter. It is impossible without the computer. And we need the computer in our study. We read some textbooks, do exercises, search for information, write text works.

We use not the computer only for benefits of us. But we use it for our entertainment. We can watch movies, listen to music, read books, newspaper or magazines, know news and play games. If we are far away and cannot meet with our family and friends we can talk with them on Skype. We can see each other. And if we will want to learn foreign language we will be able to learn foreign language with the computer. We are able to find information, friends, works, hobby and on so.

We spend a lot of time with the computer. The computer is one of the most important parts of our life. And we need the computer in our life in our time. We are able to do our business without it. But we will do them a long time. The computer has a lot of benefits for us and our time.
