There are many characters in any book. Some of them are the main ones, some are not. Jimmy Langton is certainly not the main character, but he was of great importance in the life of Julia Lambert.

In the city Middlepool, was the theatre, which was led by Jimmy Langton. This theater was very successful, mainly because of Langton's successful leadership. Man and in real life succeeds, if he is engaged in a business that loves. Jimmy was a realist, and he knew he was a bad actor. And he wasn't handsome. He was fat, had no hair on his head, and was not young at all. But he had a lot of energy. His love for the theater and strong energy made a miracle. Theatre in a small town has become very successful and popular. Jimmy learned how to make actors open their talent to the maximum. Even from a bad actor like Michael Gosselyn , Langton got a little talent and used Michael's good looks.

Jimmy Langton was a good man. There was a place in his heart for kindness. He could pay a compliment to an old and poor actor to cheer a man up.

Langton also played a huge role in the life of Julia Lambert. He the first saw in her talent of great actress and helped realize this. Before that, Julia played the role of a servant. Julia's father was french, so she could make a foreign accent. She could play uninteresting parts in a small theater all her life. Jimmy Langton had changed her fate .He gave her the opportunity to discover her talent and believe in her powers.

My opinion is that Jimmy Langton was more important to Julia than Michael. Because even if Julia's husband was someone else, she would still be a good actress. And if she hadn't met Jimmy Langton, she might not have been the best actress in England.
