I like my neighborhood. It's quiet here and I feel safe. What surrounds me?

I really love my neighborhood. It is a quiet and safe place with beautiful neighbors. Of course, it is good to live in my neighborhood. Despite the fact that it has a lot of cars and people, it is very quiet here than in big cities. For example, even during the holidays you hardly hear noise, screams or anything else. Of course, if there are several construction sites or many children, there may be noise, but it is relatively quiet.

In addition, here I feel completely safe. Neighbors and people are kind, everyone comes to the aid of another. Since there are not so many cars, we do not worry about endless traffic jams. I do not need to go home three hours earlier to catch a job or study.

In addition, in my environment a large number of forests, parks and different plants and trees. For this reason, my city has very clean air. And because of this I really like running around in the morning. Early in the morning very few people, and the air - the cleanest, so this is the ideal time for sports.

However, on the other hand, my city is very boring. Most suitable for families and adults. For me, this place is very boring, I have nothing to do in my spare time. I would be very happy if an amusement park was built in my area.

In conclusion, my neighborhood is a cozy place to live. Not much noise, they are safe and good neighbors. And even if, on the one hand, you can say that this place is very boring, and there are no places for rest, and on the other hand, for me the safety and cleanliness of the environment is more important than the fun. In addition, to relax, you can simply walk or go in for sports in the fresh air or even go to another city.

For me there is no place better on earth than in my environment.
