When I was younger, it was so easy for me to choose my future profession. At the age of 5 I wanted to be a salesman in a candy store. And when I turned 10, I was sure I was going to be a doctor.

First of all, I want to say that the ideal profession for me is not only a good salary and career, but also job satisfaction. I mean, I can Wake up every morning happy and full of energy to do my job. I would also like to have good colleagues and loyal bosses.

In the matter of choosing a profession can not be mistaken, because the chosen profession will accompany us for the rest of our lives.

I am interested in the legal profession. These are respected people, without whom almost no institution or company can do. You can work as a lawyer, both in public organizations and in private enterprises, and you can open your own practice.

Since we live in a state of law, lawyers in it are very popular. Every now and then there are disputes that need to be resolved fairly and legally. I am sure that in order for everyone to live comfortably in our society, life in it must be built on the basis of laws and clear rules. And to regulate all these processes need different kinds of lawyers.

I understand that there are a lot of lawyers in our country, there is a lot of competition among them, but, as in any business, professionals are highly valued and have an advantage. Therefore, I will need to put a lot of effort and time and try to become a real Pro to take my niche in my career and a worthy place in life.

I want to benefit the society in which I live, because if we resolve all disputes and conflicts in a civilized manner and according to the law, then everyone will live better. I'm sure of it.
